

Dear Homeowner,

Congratulations on your new home! As you prepare for this exciting transition, our goal is to ensure your move-in process is seamless, structurally sound, and financially savvy.

To ensure the highest standards of safety and convenience, **we strongly recommend furnishing your home with our specialized In-House Interior Team**. By choosing our integrated services, you bypass the complexities of third-party management and gain access to exclusive benefits designed specifically for this society.

Why Choose the In-House Team?

- **Move In on Day One:** You can begin your interior work **before official possession**. This allows you to move into a fully finished home the moment you receive your keys.
 - **Structural Expertise:** Our team possesses an intimate understanding of the **Mivan construction** used in this project. We adhere to strict engineering standards to protect the integrity of the building. (Please note: To prevent structural damage, we do not permit non-certified interior firms).
 - **Seamless Financing:** Simplify your budget by opting for an **Interior Loan bundled with your Housing Loan**. This eliminates the need for high-interest top-up loans and redundant paperwork.
 - **Turnkey Solutions:** We manage everything from modular units to non-modular bespoke requirements. You will have a **single point of contact** for the entire process, ensuring total accountability.
 - **Damage-Free Customization:** Enjoy full flexibility in design with our specialized techniques that ensure **zero damage or chipping** to the structural walls.
-

Guidelines for External Vendors

Should you choose to engage a service provider other than the In-House Team, please be advised that the following security protocols will strictly apply to safeguard the property:

1. **Security Deposit:** A refundable deposit of **₹2,00,000 (Two Lakhs)** must be maintained to cover potential structural or cosmetic damages caused by external labor/vendors.
2. **No Early Access:** External work—including measurements and marking—cannot begin until after official possession and the issuance of an NOC.
3. **Liability for Common Areas:** The flat owner remains fully liable for any damages caused by their vendor to the premises (including staircases, passages, and ducts). Repair costs will be deducted directly from the deposit.
4. **Debris Management:** The client/vendor is solely responsible for the immediate removal and relocation of all construction debris outside of the property premises at their own expense.

Ready to start designing? Our team is on-site and ready to transform your floor plan into a home. Would you like me to schedule a consultation call with our design lead to review your floor plan?

Would you like me to send over our latest design catalog or schedule a quick site walkthrough with our lead designer?
